EDUCATION

Rutgers University, Rutgers Business School

New Brunswick, NJ

B.S. in Finance & Business Analytics and Information Technology

Expected Dec 2028

- Cumulative GPA: 3.2/4.0 | Major GPA: 3.48/4.0 (Finance), 3.77/4.0 (BAIT)
- Relevant Coursework: Data 101, Data Structures, Multivariable Calculus, Introduction to Linear Algebra, Management Information Systems, Operations Management

PROFESSIONAL EXPERIENCE

Rutgers Business School, Dean's Office

New Brunswick, NJ

Data Analytics Intern

Jul 2026 – Present

- Build a Tableau dashboard tracking US News MBA rankings across Big Ten/BTAA business schools, reshaping wide-format ranking data into a longitudinal structure to enable trend analysis
- Design an outcome-visualization dashboard tracking post-graduation reporting rates, aggregating and de-identifying student data and restricting access to safeguard privacy
- Partner directly with the Assistant Dean for Analytics and Strategic Intelligence through iterative feedback cycles to refine dashboard design and improve reporting accuracy

Rutgers School of Communication & Information

New Brunswick, NJ

IT Helpdesk Associate

Jun 2026 – Present

- Resolve technical support tickets via phone, email, and walk-in requests, documenting issues and resolutions to maintain accurate service records
- Troubleshoot hardware and software issues for students, faculty, and staff, and configure equipment to department specifications
- Coordinate with fellow consultants to maintain lab readiness and ensure smooth daily helpdesk operations

Rutgers Hack4Impact

Piscataway, NJ

Executive Director

Jul 2025 – Sep 2026

- Direct a 20-member multidisciplinary team to design and launch a full-cycle software product for a nonprofit client, owning project scope, timelines, and deliverables
- Build the organization's website with Sanity (headless CMS) and develop bootcamp infrastructure and training resources to onboard and upskill incoming team members

PROJECTS

Credit Portfolio Expected Loss & Stress Testing Dashboard

- Built a Python/SQL model to calculate expected loss ($PD \times LGD \times EAD$) and aggregate portfolio-level credit risk
- Developed an interactive dashboard to analyze portfolio sensitivity under stress scenarios, improving risk-assessment speed by ~35%
- Aggregated loan-level data into portfolio-level insights to support risk management decision-making

Fraud & Anti-Money Laundering Detection Network

- Built a fraud/AML detection pipeline in Python and SQL, using NetworkX to model transaction relationships as a graph and surface patterns indicative of money laundering rings
- Integrated the Gemini API to flag and summarize anomalous transactions for analyst review

SKILLS

- Technical: SQL, Tableau, Power BI, R, Python (Intermediate), Java (Intermediate), Excel, LaTeX
- Languages: English, Tamil, French, Hindi
- Certifications:
